3 SIZES FOR UNLIMITED POSSIBILITIES

- Ø 19 MM (BAB2472TDE)
- Ø 25 MM (BAB2473TDE)
- Ø 32 MM (BAB2474TDE)

Titanium Diamond Technology

Extra-long Titanium Diamond Technology heating barrel for faster styling and a flawless finish, especially on very long hair. The BAB2472TDE – BAB2473TDE – BAB2474TDE provide 60% more heating and curling surface. Titanium infused with diamond powder guarantees a perfect resistance to high temperatures and wear-out due to intensive professional use.

These curling tongs heat up very quickly and are ready to use in an instant.

The temperature control, with 30 settings, allows you to select precisely the temperature you want. If your hair is very fine, a lower setting will give you the best results and will fully respect the integrity of your hair. If you have thick, wavy or resistant hair, use a higher temperature for optimal results.

FEATURES

- Titanium Diamond technology on the heating barrel
 - Ø 19 mm BAB2472TDE
 - Ø 25 mm BAB2473TDE
 - Ø 32 mm BAB2474TDE
- On/Off switch - on indicator light
- Automatic switch off after 72 minutes
- 30 temperature settings (135°C to 220°C) - linear adjustment
- Stay-cool tip
- 2.70 m swivel cord
- Built-in stands
- Heat mat and thermal styling glove included.

TEMPERATURE CONTROL GUIDE

Heat setting	Hair type	Temperature °C
1-5	damaged	135°C - 140°C
5-10	coloured	140°C - 155°C
10-15	thin	155°C - 170°C
15-20	medium	170°C - 185°C
20-25	thick	185°C - 200°C
25-30	wavy, afro	200°C - 220°C

These curling irons also have built-in stands that allow you to keep them stable after use and in this way to protect your surfaces. There is also a stay-cool tip to make styling hair easier and safer.

INSTRUCTIONS FOR USE

- Plug the unit in and press on the 'I' button. The iron will begin to heat up. Set the temperature using the selector. The red indicator light will flash for a while until the unit reaches the desired temperature. When the light is fixed, the unit is ready to use.
- Divide dry or damp hair into equal sections and comb before curling. Press on the clamp lever, place the iron halfway along the section of hair and spread the hair evenly between the clamp and the barrel. Pull the iron gently to the end of the hair. To prevent crimps, make sure the hair is properly coiled under the clamp, in the direction of the curl. Place the clamp on top of the section to curl the hair under. To curl the hair out, place the clamp underneath the section.
- Coil the hair up to where you want the curls to start, being careful not to touch the scalp with the barrels. Keep the iron in place for 5 to 8 seconds. For tighter, bouncier curls, work with only a little hair at a time. For looser, softer curls, work with more hair.
- To remove the iron, press on the clamp lever and pull the iron out. Wait until the hair has cooled before brushing or combing to allow the curls to 'set'. For best results, we recommend using BaBylissPRO® styling products.
- After use, press the '0' button and unplug the unit. Wait until it has cooled completely before

putting it away.

- If the unit remains unused for longer than about 72 minutes, the auto shut-off will turn the unit off; this option increases the life of the barrels and provides greater safety.

MAINTENANCE

Once unplugged and cooled, the iron may be wiped with a damp cloth. Make sure it is completely dry before plugging it in again.

WARNING

The barrel becomes very hot in a few seconds and should not touch skin once plugged in. This iron becomes extremely hot when set to the highest temperature. Always test the iron on a section of hair to make sure that the setting is appropriate for the hair.
