

**Operating Instructions**

**IMPORTANT SAFEGUARDS**  
When using an electrical appliance, basic precautions should always be followed, including the points listed below. Read all instructions and safeguards before using any electrical appliance.  
DANGER  
To reduce the risk of injury or death by electric shock:  
1. Do not reach for an appliance that has fallen into water. Unplug immediately from the outlet.  
2. Do not use while bathing or in a shower.  
3. Do not place or store appliance where it can fall or be pulled into a tub or sink. Do not place in or drop into water or other liquid.  
4. Always unplug this appliance from the electrical outlet immediately after using.  
5. Always use this appliance before charging.

**WARNING**  
To reduce the risk of burns, fire, electric shock or injury to persons:  
• This appliance can be used by children aged from 14 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved. Children shall not play with the appliance. Cleaning and user maintenance shall not be made by children without supervision.  
**Warning: Keep the Product Dry!** It is essential to PREVENT electrical equipment from coming into contact with water or other liquids.  
• Use this appliance only for its intended use as described in this manual. Do not use attachments not recommended by the manufacturer.  
• If the supply cord is damaged, it must be replaced by the manufacturer or its service agent or a similarly qualified person in order to avoid a hazard.  
• Keep the cord away from heated surfaces.  
• Do not use outdoors or operate where aerosol (spray) products are being used or where oxygen is being administered.  
• Do not use the appliance with a damaged or broken cord nor with anything missing from the blades, as injury may occur.

**SAVE THESE INSTRUCTIONS**  
This appliance is not designed for household use.  
A - Bottom blade  
B- Blade slide (on Multi-cut (MC) clipper only)  
C - Taper lever (on Multi-cut (MC) clipper only)  
D - Switch  
E- Top blade  
F - Power screw

**CLIPPER MAINTENANCE**  
Your Wahl clipper blades were oil and aligned before leaving our factory; however, it is possible for blades to get bumped out of alignment. Blades must be realigned if they have been removed for cleaning or replacement. To determine if realignment is necessary, compare your clipper blades with diagram G.  
1 If your clipper has a taper lever, position the taper lever in the close cut position. (H)  
2 End of top blade teeth should be approximately 1/32" (0.4 mm) back from bottom blade. This is important so that the clipper does not cut too close or allow the moving cutter to touch the skin.  
3 Extreme left-hand tooth of top blade must be covering or to the left of the first small tooth of bottom blade.  
4 Extreme right-hand tooth of top blade must be touching the big tooth on the bottom blade.

If blade alignment is incorrect, add a few drops of Wahl Clipper Oil to the blades, turn clipper "On" for a few minutes, turn "Off" and unplug. Loosen screws slightly and adjust (steps 2-4 listed above). Tighten screws after blades are aligned. Other than blades this clipper has no user serviceable parts. (diagram I)

**OIL (I)**  
The blades of your new clipper should be oiled every few haircuts. Simply place a few drops of Wahl Clipper Oil on the teeth of the blades. Use only the Wahl Clipper Oil included in the pack. Due to the high speed of your Wahl clipper, the correct type of oil must be used. Do not use hair oil, grease or any oil mixed with kerosene or any solvent, as the solvent will evaporate and leave the thick oil, slowing down the blades. Wahl Clipper Oil is a very thin, natural oil which will not evaporate and will not stick down the blades.

**POWER SCREW (Not found on all models of Wahl Clippers)**  
If your clipper has a power screw, please use it when adjusted for peak efficiency before leaving the factory. However, if voltage in your home is low, you may need to readjust it.  
To adjust power, use the plastic brush, a screwdriver or a thin coin to turn power screw in a clockwise direction until the arm strikes the coil, making a noise. Then, slowly turn power out (counterclockwise), just until noise stops. Then set the maximum power setting. (K)

**CORD**  
The cord should not be used to pull the clipper. Since freedom of movement needs to be maintained, care should be used to keep the cord untwisted and unobstructed. When stored, the cord should be coiled and the unit placed in original box or storage pouch (if provided).  
If your clipper has a polarized plug: To reduce the risk of electric shock, this appliance has a polarized plug that will only fit one way. If you are unable to insert it fully in the outlet, reverse the plug. In event the still does not fit, contact a qualified electrician to install the proper outlet. Do not change the plug in any way.

**TAPER LEVER (Not found on all models of Wahl Clippers)**  
If your clipper has an adjustable taper lever, it is conveniently located near your thumb (if you're right-handed), so it can easily be adjusted. The taper lever allows you to gradually change the closeness of your cut without a guide comb. When the lever is in the uppermost position, the blades will give you the closest cut and leave the hair very short. (diagram H) Pushing the lever downward gradually increases the cutting length. In its lowest position, the taper lever will leave the hair approximately the same length as the 1/8" guide comb. (diagram K2)

The taper lever will also extend the use of your blades since a different cutting edge is used in each setting. In addition, if extremely heavy haircutting has jammed the blades, it will help you remove hair that has become wedged between the blades without the blades jamming. When the clipper is running, rapidly move the taper lever from "close cut" to "longer cut" a couple of times. Doing this each time you've finished using your clipper will help keep the blades clear of hair. If your clipper stops cutting and this does not help, your cutting blades may be dull. Either replace them or return them to Wahl for sharpening.

**WAHL'S GUIDE TO FOOLPROOF HOME HAIRCUTTING**  
**Before you cut your hair**  
1 Your kit includes a plastic cape and 16 perfect working condition.  
2 Your kit includes a plastic cape, used in around the neck, tying the strings and overlapping the cape portion to prevent hair from falling down inside the collar. If no cape is provided, a towel will do.  
3 Position the person whose hair is to be cut on a stool or chair so that the top of his head is about even with your eyes.  
4 After combing the hair to remove all tangles, hold the clipper in a relaxed, comfortable grip, with the ratchet/namptie (on the right) in your left hand. This grip will help you maintain control, accurate length control.  
**NOTE:** To attach guide combs, hold comb with the teeth up. Snap guide comb attachment firmly to the bottom of the clipper blade. (L)

Depending on the kit you purchased your kit may include one of the following:  
**Adjustable Guide Combs** - allowing multiple cutting lengths in the convenience of a single comb.  
**Individual Color Guide Combs** - providing predetermined lengths indicated on each guide comb.  
**Individual Color Guide Comb** - providing predetermined lengths indicated on each guide comb. Combs are also color coded for quick cutting length reference.  
**Using adjustable guide combs:**  
The small adjustable guide comb has five settings from 1/8" to 5/8" (3mm to 16mm) in 1/8" (3mm) increments. (M)  
The large adjustable guide comb has five settings from 3/4" to 1-1/4" (19mm to 32mm) in 1/8" (3mm) increments. (N)  
Using your thumb, you can change the length of the cut by simply sliding the adjustable lever to the next position. Both adjustable guide combs have positive click stops and indicators that show position number and cutting length in millimeters for quick and easy setting identification.  
The large adjustable guide comb can be used from the ear to the crown of the head. (O1)  
The small adjustable guide comb can be used from the nape of the neck to the ear area. (O2)

**Using individual (black or colored) guide combs:**  
Some kits do not include all Wahl guide combs. However, any of these combs (or additional accessories not listed here) may be available from your dealer or can be ordered directly from Wahl.  
**INDIVIDUAL COLOR CODE KEY:**  
• 3mm - Black/Red  
• 4mm - Black/Purple  
• 5mm - Black/Black  
• 6mm - Black/Pink
